

Artificial Intelligence-Powered Learning Analytics and Student Feedback Mechanisms for Dynamic Curriculum Enhancement and Continuous Quality Improvement in Outcome-Based Education

Chapter	Title	Page No.
1	Conceptual Framework of Outcome-Based Education and the Role of Artificial Intelligence in Continuous Quality Enhancement	12
2	Intelligent Learning Analytics: Data-Driven Approaches for Personalized and Adaptive Learning in Higher Education	40
3	Cognitive Science and AI-Driven Pedagogical Models for Dynamic Curriculum Development in OBE	68
4	Natural Language Processing for Automated Student Feedback Analysis and Sentiment Assessment in Digital Learning Environments	95
5	Predictive Analytics for Learning Outcomes: AI-Powered Student Performance Monitoring and Early Intervention Strategies	124
6	AI-Driven Student Feedback Systems: Implementing Machine Learning Models for Personalized Assessment and Learning Pathways	151
7	IoT-Enabled Classroom Data Collection and AI-Based Sentiment Analysis for Dynamic Teaching Adjustments	178
8	Blockchain and Smart Contracts for Secure, Transparent, and Immutable Student Feedback Management in OBE	206
9	Multimodal Learning Analytics: Integrating Speech Recognition, Facial Emotion Analysis, and Biometric Data for Student Engagement Evaluation	233
10	AI-Enabled Chatbots and Virtual Assistants for Real-Time Student Support and Personalized Learning Recommendations	261
11	Federated Learning in Education: Enhancing Student Privacy in AI-Based Feedback Mechanisms	288
12	Reinforcement Learning for Automated Curriculum Adaptation Based on Continuous Student Feedback Loops	316
13	Digital Twin Technology for Real-Time Simulation of Learning Outcomes and Curriculum Effectiveness in OBE	339
14	Graph Neural Networks for Predicting Course Performance Trends and Curriculum Optimization	367
15	Automated Rubric-Based Grading Using Deep Learning and Computer Vision for OBE Assessments	394
16	AI-Powered Teacher Performance Evaluation and Pedagogical Strategy Optimization in Higher Education	421
17	Big Data and AI-Driven Institutional Policy Formulation for Evidence-Based Decision Making in OBE	452

18	Neuroscience-Inspired AI Models for Understanding Student Learning Behavior and Adaptive Teaching Metho	479
