IoT-Enabled Smart Health Care Systems

Chapter	Title	Page No.
1	**Cyber Physical Systems and Digital Twin Technologies for Real Time Patient Health Simulation and Personalized Treatment**	13
2	**AI Enabled Predictive Analytics and Decision Support Systems for Early Disease Detection and Clinical Diagnosis**	49
3	**IoT Powered Wearable Medical Devices and Continuous Health Monitoring Systems for Personalized Patient Care**	79
4	**Smart Hospital Infrastructure with AI Driven Workflow Automation and Resource Optimization for Efficient Healthcare Management**	115
5	**IoT Based Remote Patient Monitoring and Telemedicine Solutions for Accessible and CostEffective Healthcare Services**	146
6	**AI and IoT Enabled Smart Drug Delivery Systems with Automated Medication Adherence Monitoring**	176
7	**Blockchain Integrated Smart Healthcare Frameworks for Secure and Transparent Electronic Health Record Management**	209
8	**AI Driven Medical Imaging and Computer Vision Techniques for Enhanced Disease Diagnosis and Treatment Planning**	237
9	**IoT Based Smart Intensive Care Units with AI Powered Predictive Maintenance and Automated Life Support Systems**	264
10	**AI Powered Robotic Surgery and Smart Prosthetics for Precision Medical Interventions and Rehabilitation Solutions**	293
11	**IoT Enabled Mental Health Monitoring and AI Driven Cognitive Behavioral Therapy Systems for Personalized Treatment**	321

12	**AI and IoT Based Epidemic Surveillance Systems for Early Detection and Smart Containment of Infectious Diseases**	350
13	**Integration of Renewable Energy Sources in Smart Healthcare Facilities Using AI Based Energy Optimization Systems**	378
14	**IoT Security and Privacy Challenges in Smart Healthcare with AI Based Threat Detection and Risk Mitigation Strategies**	404
15	**AI Enabled Smart Ambulance Systems with IoT Based Real Time Emergency Response and Patient Monitoring Technologies**	433
