

Artificial Intelligence and IoT-Driven Predictive Models for Next-Generation Healthcare Systems

Chapter	Title	Page No.
1	Introduction to AI, ML, and IoT in Medical Diagnostics	12
2	Data Acquisition and Preprocessing Techniques for Medical Imaging and IoT Healthcare Devices	38
3	Machine Learning Models for Early Detection of Lung Cancer Using Medical Imaging	69
4	AI-Enabled Kidney Stone Detection and Prediction from CT and Ultrasound Images	100
5	Deep Learning Approaches for Accurate Brain Tumor Segmentation and Classification	131
6	AI-Powered Breast Cancer Detection Using Histopathological and Mammogram Data	159
7	IoT and ML Frameworks for Stroke Detection and Real-Time Patient Monitoring	189
8	Hybrid Deep Learning Models for Skin Cancer Detection through Dermoscopic Imaging	218
9	ML and IoT Approaches for Early Diagnosis and Prediction of Alzheimer’s Disease	250
10	Artificial Intelligence in Melanoma Detection: Image Analysis and Predictive Analytics	280
11	Blockchain and IoT for Secure Medical Data Management in Healthcare Applications	309
12	Ethical, Legal, and Social Implications of AI and IoT in Medical Diagnostics	341
13	Future Trends: Towards Autonomous AI-Powered Smart Hospitals and Precision Healthcare	365
14	Machine Learning–Based Predictive Analytics for Stroke and Cardiovascular Risk Assessment	391
15	Machine Learning–Based Predictive Model for Early Diagnosis of Thyroid Disorders	419
